

Custom Software Applications

## CourtTrack Court Services Software

Courts have their own special needs when it comes to tracking payments, and no company has ever addressed these needs, until now. CourtTrack is the first cashing software specifically developed for handling payments to court systems.

With CourtTrack, you can keep every fact, affiliated party, and document together in one place on your hard drive. Want to see how much a fee will be? Search by name, lawyer, date, almost anything... and have all the information at your fingertips in seconds. Need to add a hard copy of a paper file? Just scan the page, and the image is attached to the case in seconds.

### A Lot More Than Just Cashing

CourtTrack stores deputy names, warrant serve attempts, lawyers, court types – basically everything you need to track – with its powerful back-end database. This makes the process of entering a new docket quick and painless. Then, you can search the database and have all of the documents without ever having to dig through your file cabinets again.

#### Powerful Reporting

CourtTrack can produce for you at a moment's notice four powerful reports:

- Deputy Report
- Status Report
- Collections Report
- Cashier Report

You will now know immediately how much you have collected in fees, whether it be cash, check, or money order. See the status of all civil dockets, check on the case load of a deputy, or number of attempts to serve a warrant... faster than you could ever before.

# CourtTrack

**Track Warrant Attempts**

**Record New Document**

**Document Search**

**Date Range Search**

**Court Services Detail**

**Label and Receipt Printing**

**Scan Images into Record**

**View Paper Documents**

**Fee Configuration**

**Legal Database**

**Multiple Security Settings**

**Report Wizard**

Check on the total amount of attempts to serve a warrant, with dates and attempts per deputy

Enter document type and date, and the program will give you the fee and ask for payment

Search by up to 13 different fields, including log # and court case #, document type, name, etc.

Search by date range for records based on dates recorded

Keep all plaintiff and defendant info as well as judgments and payments all together

Label printer will print receipts and labels at one touch

Easy to add new documents to the image database, just bring up record and hit "scan"

See all paper records that are associated with the case

Choose the document types and fees for each

Input court types, Deputies, and Attorneys into system

Set up user accounts and choose their level and privileges

Generate cashier, Collections, Status, and Deputy reports easily

**For more information about CourtTrack or our other document management software, including digital imaging, call 800-644-7112 or visit [www.pdswest.com](http://www.pdswest.com).**

Powerful Search With 13 Different Fields
